

ENTTEC VOCUS

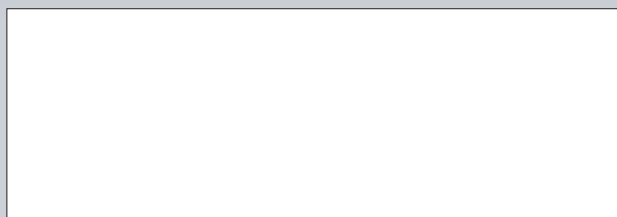

Tell your lights where to go!

Features

- Control of up to 512 channels
- Compatible with Open DMX USB
- Can output using with ESP & Artnet
- Can also interface to Lightfactory

Part number: 70402

Enttec Vocus is an amazing new way to focus your lights. By using any microphone (wireless or wired) plugged into your pc you can set channel levels remotely. Great for quick focusing of lights, this inexpensive tool will quickly become invaluable after the first few uses.

Once voice trained vocus will recognize simple commands such as:

- channel 7 at full
- channel 4 thru 46 fade to 50
- channel 187 at zero
