

ENTTEC WINGS

Program Wing

Shortcut Wing

Playback Wing

Fast & efficient

The Enttec Program Wing is designed to allow fast editing of lighting states and creation of cues, palettes, groups, etc. in LightFactory and other PC-Based lighting control systems. It includes 3 rotary encoders, a 4 line large text display area, a numeric keypad section, and dedicated buttons for all major program features, windows and functions. The Enttec Programming Wing connects via Ethernet to your PC and thus could even be connected wirelessly or in multiple locations.

Intuitive & Rapid

The ENTTEC Playback is an Ethernet-enabled input device designed to be used in conjunction with computer based applications such as Enttec Lightfactory (over ESP) or as a standalone Art-Net controller.

Compact & flexible

The ENTTEC Shortcut Wing is the perfect add on for LightFactory or any PC lighting control software. The wing is Ethernet based so multiple units can be connected in one or many locations, letting the user customise his or her layout as they want.

Specifications:
H32-50mm W340mm D240mm

Part number:
70031 (Shortcut)
70032 (Playback)
70033 (Program)
