

## HIGH TENSION CLAMP

### HIGH TENSION CLAMP

The HTC clamp can be used to attach a Littlite® L-series lamp to a pipe, bar, table or panel edge. The lamp can be attached to the clamp in several ways:

- 1) Positioned vertically on the clamp with the screws, washers and lock washers provided as shown in the drawing
- 2) Temporarily attached vertically or horizontally to the lamp chassis with the (SM) snap mount

Before adhering the snap mount to the clamp, be sure to wipe the clamp surface with an alcohol-moistened wipe and let dry thoroughly.
